REFERENCE SHEET

We hereby confirm that we have applied THRcoating ALPHA Flexible Reflective Insulating Coatings to our roof. In total, this involved two roofs with a total area of 45,000 m² for a total value of EUR 607,000.

The application took place in 2022, under a period of two months. With a gap of 6 months, we can report that the building no longer overheats inside and there is no need to air-condition the premises as much. At the same time, this step has extended the life of the roof cladding.

Yours sincerely

Rashid A. Shaikh
